

aBIZo™ Minimum Technical Requirements

MOBILE DEVICE

aBIZo™ Mobile Application should run on the following:

- OS: Android (v4.4 and above) or iOS (v9.0 and above)
- Minimum Resolution: 320 x 480
- Location: Built-in GPS (with A-GPS, GLONASS recommended)
- Connectivity: SMS, Mobile Data (at least with 3G connectivity), and WIFI (at least 802.11g)
- Camera (optional): any resolution (used for reporting with pictures)

COMPUTER HARDWARE

aBIZo™ Command Center web application should run on the following (desktop or laptop):

- Processor: Any processor that can run at least Windows 7
- OS: Any operating system that can run Chrome web browser (v50 and above)
- Web Browser: Chrome (v50 and above) preferred but may run on IE11, Edge and Safari
- RAM: At least 2GB
- HDD: 50GB of available storage space (after OS installation)
- Display: at least 14-in LCD/LED monitor with a minimum supported resolution of 1024X768 (larger display and higher resolution are highly recommended)
- Keyboard and Mouse: Standard
- Speakers: any power rating that can be used for audio alerts
- Connectivity: LAN (at least 10Mbps) or WIFI (at least 802.11g)

INTERNET BANDWIDTH

aBIZo™ mobile app requires very little bandwidth and should run on:

- PEAS, PAWS and IReS (no picture): at least 4Kbps per mobile device or 10Mbps shared per 10,000 devices
- IReS (with picture): at least 64Kbps per mobile device (since reporting with picture is not performed with multiple simultaneous devices, rating is still 10Mbps shared per 10,000 devices)

aBIZo™ Command Center should run on:

- At least 1Mbps per Admin or Agent workstation (2Mbps or higher is recommended)
